An  Ingersoll Rand business

strength

intelligence

agility

comfort

Customers asked us to make it stronger,
more intelligent, more agile and more comfortable.

We took it all the way to

Precedent.

We spent two years talking with customers about their golf cars. What they loved. What drove them crazy. From improved exterior durability to tighter steering, more comfortable seats to easier access to mechanical and electrical components, head professionals, owners, managers and superintendents at golf courses across the country told us what it would take to create their dream car. Then we spent two more years building it. Why? Drive Precedent once and you'll know.

Non-corrosive, bonded seat won't rot, wrinkle or slip.

Revolutionary PowerShield™ protective housing completely safeguards the electrical and power systems, deflects ground debris, and channels water away from sensitive areas.

360° Bumper™—combined with 5 mph front and rear impact bumpers—protects the frame and overall vehicle. Means fewer scratches, less collision damage, and additional protection for your investment.

Automotive ladder-style aluminum frame is fused to a fiber-reinforced, friction-bonded underbody. The result is the AlumiCore™ chassis, which has double the torsional rigidity and built-in debris protection for the wiring, brakes and pedal group.

Surlyn is strong enough to cover golf balls, and now it covers Precedent. Body color is molded into the Surlyn Reflections® body panels, so there's no clear coat or paint to worry about.

Customers asked us
to make it stronger.
We took it all the way to
ripped.

Strength you can feel, appreciate and trust. Strength that starts on the surface and continues all the way to the car's soul. Strength from the company rated #1 in durability and reliability. Strength that sets a whole new precedent.

IQDM hand-held diagnostic tool is a fast, hassle-free way to keep your entire fleet operating at peak capacity and profitability.

40% fewer parts means less maintenance and even greater reliability.

Relocated access panel for easy maintenance and tamper-resistant governors.

Industry's first and only 4-battery, 48-volt power plant is more efficient to run and less costly to maintain.

Front suspension has two, simple lubrication points and maintenance-free, sealed bearings.

Pedal group and brakes are pre-set, sealed and adjustment-free.

Customers asked us to make maintenance more intelligent. We took it all the way to **brilliant.**

Intelligence that makes it easy to maintain, service, run, clean, inspect and diagnose. Intelligence that keeps it on the course more and in the service bay less. Intelligence from the company rated #1 in service and support. Intelligence that sets a whole new precedent.

IQ System lets you customize the car to fit your course. Its re-engineered, regenerative braking control is incredibly smooth, with no hesitation.

Lighter weight improves handling, climbing, accelerating and even braking.

SportDrive™ creates an invigorating, sports-car-like driving experience with nimble acceleration.

AlumiCore™ chassis adds to the enhanced stability, ride and performance of the car.

The industry's tightest clearance circle means superior maneuverability in your storage area and handling on the course.

Customers asked us
to make it more agile.
We took it all the way to
olympian.

Agility that stretches from the wheels all the way to your senses.

Agility that provides astonishing handling, control and acceleration.

Agility from the first golf car company to deliver fully-customizable performance. Agility that sets a whole new precedent.

MonsoonTop™ is the industry's first canopy with built-in drain spouts. Rain is automatically channeled straight to the ground.

Developed using ergonomic software, Club Car's Ergo Seat is larger, taller, and more erect for support, proper posture and driving position. Curves in the seat bottom promote comfortable space between the driver and passenger.

FlexiDrink™ cup holders fit all types of drink containers, and can bend without breaking.

Internal canopy handle is longer, provides more hand position options, and increases comfort and security for drivers and passengers.

The industry's widest steering-wheel-to-armrest space means it's easier for the driver to enter and exit.

Redesigned bagwell is now the industry's largest. Center divider and textured surfaces keep bags from slipping, while raised bag supports and ample drainage holes keep bags dry. Strap clip is easier to grab, open and close.

Large dash compartment, deep sweater basket, and available canopy cargo net provide unparalleled storage.

Customers asked us
to make it more comfortable.

We took it all the way to

cozy.

Comfort that's surprising, innovative and appreciable. Comfort

that's blatantly obvious, yet completely unexpected. Comfort

from the company committed to providing great golf experiences.

Comfort that sets a whole new precedent.

"Even though rounds are down right now, ridership and revenues are up with Precedent."

"It's just quality, plain and simple. When this car gets hit—and it does—it's sturdy. It really is."

- GUY WIMBERLY, HEAD PROFESSIONAL
ARROYO DEL OSO
ALBUQUERQUE, NM

"Everything is just so much easier. You put the car away at night, then bring it out and run it around the course all day without thinking about it."

"Members reaction has been nothing but positive. They like the look of the car. They like the feel of the car. They like the way it handles."

- JOE DEVANEY, DIRECTOR OF GOLF
THE PENINSULA CLUB
CORNELIUS, NC

"Comparing this car to the competition is like comparing a Mercedes to a Yugo. Just take one out and drive it around the corner once. That's all you'll need."

"Nice big bagwell. I like the fact that we can fit two big staff bags back there with room to spare."

- BRADY GODFREY, HEAD PROFESSIONAL
HARBOR HILLS
LADY LAKE, FL

"I've been using Club Cars for as long as I can remember. I've always told people that no other car even comes close to their dependability and durability. Well, now they've taken another step up."

"This is one of the most accessible cars I've ever worked on. Some maintenance jobs have been cut in half in terms of time and effort. I've been in the business more than 40 years, and this is the easiest I've seen it."

- JIM HARTLEY,
DIRECTOR OF OUTSIDE OPERATIONS
PGA ESTATES
WEST PALM BEACH, FL

"Players love the drain spouts. That's what we hear about all the time. They like not dealing with all the runoff you get with other golf cars."

"The handling was more like being in an actual automobile. The ride is exceptional."

- IAN NICOLL, GM AND HEAD PRO
GOLF CLUB OF JACKSONVILLE
JACKSONVILLE, FL

We asked pilot customers
to give us feedback.
They took it all the way to
accolades.

Customers asked, we listened. Now customers are talking, and we're happy with what we're hearing. If you'd like to read more testimonials, learn additional facts or schedule a test drive, call 1.800.CLUBCAR or visit www.clubcarprecedent.com.
